## **DOE To Host Open House at Moab UMTRA Project Site Public Invited To Meet New Prime Contractors**

(Grand Junction, CO)—The U.S. Department of Energy (DOE) Office of Environmental Management will host an open house for the public for the Moab Uranium Mill Tailings Remedial Action (UMTRA) Project on Wednesday, August 29, 2007, from 4:00 to 7:00 p.m. The open house will be held in the Conference Room at the Moab site, 2021 North U.S. Highway 191, in Moab. Visitors should park in the paved parking lot and follow the signs to the Conference Room.

“We want to introduce the new contractors, *EnergySolutions* and S&K Aerospace, Inc., to the community,” said Donald Metzler, Federal Project Director. “Holding an open house at the site allows us the opportunity to show the public some of our many efforts thus far to prepare for tailings removal.” Mr. Metzler will make welcoming remarks and a brief status of the project at 5:00 p.m.

Please note that this is not a job fair for the project. Employment opportunities for the Moab Project will be posted through the Moab Workforce Services office as well as on the Moab Project website at [http://gj.em.doe.gov/moab/additional\\_info/employment.htm](http://gj.em.doe.gov/moab/additional_info/employment.htm).
