

# Moab UMTRA Project Environmental Policy

The purpose of this policy is to demonstrate the Moab Uranium Mill Tailings Remedial Action (UMTRA) Project's commitment to ensure a safe and protective environment for workers and the public. Sustainable practices that adhere to applicable environmental protection laws, regulations, and standards are put into effect. We will ensure transparency of our actions and decisions while implementing the following principles for ethical and responsible environmental stewardship:

Conduct our operations in an environmentally sound manner that is protective of the air, water, land, and other natural and cultural resources;

Fulfill compliance obligations by utilizing Environmental Management Systems and Integrated Safety Management;

Identify and protect workers and the public from hazards associated with environmental risks;

Strive to purchase GreenBuy goods and services that effectively use sustainable environmental practices;

Acquire, manage, and disposition personal property utilizing best environmental practices;

Prevent pollution, reduce waste, reuse, and recycle where possible and;

Continually improve our environmental management system to enhance environmental performance and meet environmental objectives.

All Moab Project employees are responsible for understanding and complying with environmental requirements and expectations relevant to their assigned duties as well as the protection of the environment in the course of daily operations.

Russell McCallister  
Moab Federal Cleanup Director

Swaine Skeen  
Technical Assistance Contractor
